## SELECTED PARANORMAL CASES:

### HOUSE HAUNTING, Illinois

Planned and executed a full paranormal investigation to remedy a house haunting which was caused by the home being built on an Indian Burial Ground. A family was terrorized by a spirit of the Mound Tribe that hurled rocks at them. Additionally, the children in the home were reported to be hearing glass breaking at unspecified intervals. The culmination of this haunting included the family's beds being overturned by the reported spirit(s) which led them to flee their home.

### HOUSE HAUNTING, Indiana

Responded to an inquiry of a homeowner (male) who was being attacked physically and emotionally by spirits that attached themselves to objects he acquired in Baja Mexico while on an archeological dig. Through the use of infra-red photography, I captured spirits emitting themselves from the objects. Eventually, an exorcism was performed on the man to release the spirits.

### AMITYVILLE HOUSE HAUNTING, New York

Independently investigated the famous "Amityville Horror" house; collected interviews from the townspeople and historical society, conducted research at the local library, consulted the current homeowners and successfully captured the only known image of Jody, "the pig eyes", which is currently the sole piece of physical evidence of the phenomena since the original 1977 incident.
